Practical-01

- Install Virtual box on your PC

- Create your first new VM (The specification is below)

- Download and Install Linux CentOS on your virtual box (PLEASE NOTE: During installation you will get the option to turn Ethernet ON or OFF. Please keep the Ethernet OFF for your installation)

- I would highly recommend that you install Linux OS the first time and then delete it. Then install the 2nd time and keep it. This will be a good practice for the OS installation

Specification for Linux VM is as follow:

- Memory = 2G

- Disk Space = 10G

- CPU = 1
